

## INFOPRINT 1832, INFOPRINT 1852 AND INFOPRINT 1872

### HIGHLIGHTS

- Standard 100-sheet multi-purpose feeder and extensive input and output options
- Easy-to-use operator panel offers bold icons, all-points addressable display, "show me" graphics and text, and "tell me more" selections
- PIN-based printing increases confidentiality on individual jobs
- Configure and manage devices by using authenticated and encrypted network communications
- Higher yield toner cartridges mean fewer printer interventions and less packaging, transportation, and waste

InfoPrint 1832

Many companies have turned from centralized, in-house reproduction centers to distributed, network-based printing to support departments and workgroups. This trend has proved successful because applications are closer to the users, who can turn around jobs much more quickly, streamlining overall workflow.

Distributed, network printing for typical short-run general office projects is generally more economical than repro centers or individual inkjet or desktop printers.

Printers on a network can be monitored and managed much more efficiently through management software, so you may be able to reduce help-desk costs. Networked printers pave the way for device and supply

consolidation, which can provide dramatic cost savings while you boost functionality through multifunction printers. And, advancements in security at both the datastream and printer levels contribute in multiple ways to protect data and control access and use of both monochrome and color printers.

The InfoPrint® 1832 is ideal for small and medium businesses. The InfoPrint 1852 and InfoPrint 1872 are designed for medium and large workgroups. These printers offer a range of print speeds, flexible connectivity and extensive input and output options to enable scalable solutions with low costs and high productivity.

## **INCREASE PRODUCTIVITY AND PERFORMANCE ON THE NETWORK**

The InfoPrint 1832, the InfoPrint 1852, and the InfoPrint 1872 can help you meet deadlines with output delivery of up to 45, 50, and 55 letter (43, 47, 52 A4) pages per minute<sup>1</sup>, respectively, and standard and optional finishing options.

The exceptionally easy-to-use operator panel offers bold icons, an all-points addressable display, “show me” graphics and text, and “tell me more” selections. To print PDF documents securely and quickly at the printer, use the USB direct port and a USB flash memory device.

## **SLASH HELP-DESK AND SUPPORT COSTS**

If you operate today with non-networked printers, your IT personnel are forced to diagnose, troubleshoot and solve printing problems either in person or by relying on end-user assistance. Either way, help-desk costs spiral upward. Technicians have to travel to the printer or involve one or more end users who are pulled away from their jobs.

Network attachment is standard with the InfoPrint 1832, the InfoPrint 1852, and the InfoPrint 1872. And with MarkVision Professional, a Web-enabled printer management software utility, you can monitor and manage networked printers in

your company. You can boost end-user satisfaction and reduce costs when you utilize remote viewing to reduce on-site attendance for problem determination and resolution; enable pro-active printer support with automatic alerts; set up, configure and upgrade printers from a central location; and gather useful information about printers and print jobs to forecast, plan and charge back.

## **BOOST SECURITY AND CONFIDENTIALITY**

Insufficient security at the output level can place your business at risk. With InfoPrint printers, you can reduce risk with security features at both the datastream and printer levels. The encrypted technology in these printers can help assure that encrypted print output data cannot be printed on an unsecured or incorrect printer. The Print and Hold feature offers multiple options to manage sensitive jobs at the printer level, and PIN-based printing can help increase confidentiality on individual jobs.

## **SUSTAINABILITY IS IMPORTANT**

The InfoPrint 1832, the InfoPrint 1852, and the InfoPrint 1872 were developed with your environment in mind. The low-cost duplex models can help cut your paper usage up to half when jobs default to two-sided printing. These devices use 15 – 25% less energy than predecessor models. With our new “quiet mode,” the acoustics are half as loud as its nearest

competitor. We have reduced packaging and shipping weight to less than 20 lbs for a mid-sized printer with duplex and an extra drawer.

## **REDUCE, RETURN, AND RECYCLE**

InfoPrint Solutions Company™ recognizes that environmental conservation is part of our calling as a global citizen. Reducing waste is crucial to minimizing our impact on our environment. Offering high-yield and extra-high-yield toner cartridges will extend cartridge life span and decrease overall cartridges manufactured with less tonnage in the landfill.

InfoPrint is committed to preserving natural resources through the proper handling of used printer supplies. Once a supply has reached its end of life, we encourage you to partner with us by participating in our product return programs. We are also determined to recycle supplies that cannot be reused. If a returned product can't be reconditioned because it does not meet our high standards for quality and performance, it is then broken down into raw materials. More than 90% of this resultant material is recycled into new products.

Maintenance kits are Customer Installable		

<sup>1</sup> Exact speed varies depending on document complexity, system configuration, software application, driver and printer state.

<sup>2</sup> See user documentation for specific media types, weights, and sizes that are supported.

<sup>3</sup> InfoPrint Solutions Company does not recommend printing this monthly maximum on a consistent basis.

<sup>4</sup> The Image Quality (IQ) enhancement, whether 1200 or 2400, is a special print mode designed to vary the intensity of each individual printed dot by manipulating its size to produce the appearance of greater print resolution within the limitation of a set number of dots per inch (dpi).

<sup>5</sup> Not all versions are supported. Contact your sales representative for a detailed list of supported versions.

<sup>6</sup> Assumes 5% coverage per page. Yields are provided for planning purposes and are not a guarantee of minimum life; actual yields may vary. Actual usage should be used to establish the life of the supply product in each end user's specific application. Many factors, such as print coverage per page, paper type and size, model type and environmental conditions can affect supply life. Declared yield value in accordance with ISO/IEC 19752.
